COURSES

➤ INTRADAY TRADING

A sweet introduction to the big and complex world of capital markets. This course is for everyone, here you will learn all the basics of capital markets and gradually through our classes enhance your trading skills by developing advanced analysis and software skills.

COURSES

➤ TREND ANALYSIS

Understanding market trends which help you in analyzing stock behaviour. Here you will learn to develop a complete study as it involves practical drawing of Trend Lines and cover time based Trend Analysis as well. Trend is the most powerful tool of Technical Analysis and it supersedes Indicators and Oscillators.

COURSES

➤ TECHNICAL ANALYSIS

In depth analysis of technicals to be used in trading. Covering the very basics of trend to indicators and oscillators and gradually moving on to reversal and continuation patterns followed by chart patterns.

COURSES

➤ COMMODITIES

Commodity trading requires proper knowledge. A trader must have an understanding of the global market scenarios. The trader should understand and analyse micro and macro-economic data, Industrial data. Technically he should be well versed with price action and momentum-based strategies. Our sole purpose of conducting this course is to make traders market ready, on completion of formal training modules they will be having the correct approach at their disposal to apply in the market. Unlike other Programmes this course is highly practical. It actually bridges the gap between theory and practice. It covers complete analysis of domestic and International commodity markets.

COURSES

➤ OPTIONS BEGINNER

- Options trading may seem overwhelming at first, but it's easy to understand if you know a few key points.
- Puts and calls, strike prices and premiums, derivatives and spreads.
- Options trading involves certain risks that the investor must be aware of before making a trade.
- This course teaches you real strategies to increase consistency of returns and put the odds in your favor.

COURSES

➤ ADVANCED OPTIONS

- Options Professionals: -
Build on to your basic Options knowledge by learning payoffs, probabilities and risk management. Start picking directional trades on the basis of trends.
- Learn to trade options completely by leveraging Hedging strategies and combination trades and adjustments to existing positions.
- Helpful for intermediate to advanced level options traders who have a sound understanding of puts, calls and basic option strategies

ABOUT US

We are India's leading startup in the field of Financial Education, working to standardize STOCK MARKET TRAINING by providing structured Training for every aspect of Stock Market ie. Training for Intraday, Delivery, Fundamentals, Commodities, Currencies & Derivatives

Even in the Digital space we focus mainly on content delivery followed by continuous mentoring sessions to deliver excellent results.

MISSION

We want to remove the common myth among the general population about stock markets being a gamble to stock market being a calculated risk.

We are working towards empowering every Retail Trader to understand the markets in detail by practical Training and henceforth removing the dependencies arising while making decisions before Investing/Trading.

VISION

We are working towards bridging the GAP between online and offline training by developing a Technology driven system to impart highest quality learning outcomes.
